

# GetVeevz — Website Brief

**Purpose:** Build a high-converting website that makes the GetVeevz offer immediately clear and drives qualified prospects toward booking a call / starting a campaign.

## 1. Main Goal

We turn existing long-form content into large-scale short-form distribution.

The website should make prospects understand what we do within 5 seconds and drive them toward **booking a call / starting a campaign**.

## 2. Target Customer

Founders • Entrepreneurs • Creators / personal brands • Businesses with existing long-form content • Podcasts / content-led brands

The ideal customer already creates content but wants more reach and distribution without having to build and manage the entire clipping operation themselves.

## 3. Core Positioning

### Main message

Turn Your Long-Form Content Into a Short-Form Distribution Engine

GetVeevz takes existing long-form content and turns it into coordinated short-form distribution across Instagram, YouTube Shorts and TikTok. We handle the clipping operation, campaign coordination, distribution and tracking.

### Important

**Do not position us as simply a video-editing agency.** The website should communicate: **Content** → **Clipping** → **Distribution** → **Tracking**.

## 4. Homepage Structure

### SECTION 1 — HERO

#### Headline

Turn Your Long-Form Content Into a Short-Form Distribution Engine

#### Subheadline

GetVeevz turns the content you're already creating into coordinated short-form distribution across Instagram, YouTube Shorts and TikTok.

#### CTA

**Book a Strategy Call**

#### Visual

Premium visual showing short-form videos, multiple social accounts, campaign analytics, views/results and GetVeevz branding. Avoid generic stock images.

## SECTION 2 — PROOF

### Headline

Built to Distribute Content at Scale

Show approved client logos, verified campaign results, screenshots of actual content/accounts and relevant analytics.

**Potential client names:** ThinkSchool, GrowthSchool, Rachitroo, Ranveer Allahbadia, Traders Paradise, Tai Lopez, WisprFlow — only after approval/confirmation.

**Important:** Only use logos/numbers that have been verified and approved.

## SECTION 3 — THE PROBLEM

### Headline

You're Already Creating the Content. Why Isn't It Being Distributed Everywhere?

Most creators and businesses invest heavily in long-form content but don't have the infrastructure to consistently turn that content into large-scale short-form distribution. **GetVeevz handles that operation.**

**Visual:** Long-form content → Clips → Multiple distribution channels

## SECTION 4 — WHAT WE DO

### Headline

Everything You Need to Turn Content Into Distribution

**Clipping:** Turn long-form videos into short-form content.

**Distribution:** Distribute content across relevant short-form platforms and pages.

**Campaign Management:** Coordinate the campaign, contributors, content requirements and submissions.

**Tracking:** Track campaign activity and performance.

Keep this section visual and concise.

## SECTION 5 — HOW IT WORKS

### Headline

From Content to Distribution Without Building the Operation Yourself

**01 — Give Us Your Content:** You provide the relevant content/assets.

**02 — We Build the Campaign:** We create the campaign structure, requirements and distribution system.

**03 — Clips Go Live:** Our clipping/distribution network publishes short-form content.

**04 — Track & Optimize:** We track performance and manage the campaign.

## SECTION 6 — CASE STUDIES

### Headline

See What the Distribution Can Look Like

This should be one of the strongest sections. For every case study show: **Client** → **Campaign** → **Execution** → **Results**.

Use real view counts, screenshots, clip examples, account examples and campaign metrics. Do not use generic claims when actual evidence is available.

## SECTION 7 — WHY GETVEEVZ

### Headline

You're Not Hiring Another Video Editor.

Explain that GetVeevz is built around **distribution**, not simply editing individual videos.

Focus on: managed clipping network • multi-platform distribution • campaign management • tracking • structured execution.

## SECTION 8 — FAQ

Keep this short. Answer: What exactly does GetVeevz do? What type of content can we use? Which platforms do you work with? Who creates the clips? Where are the clips posted? How does the campaign work? How long does onboarding take? How much does it cost? What results can we expect?

**Do not promise guaranteed results unless officially approved.**

## SECTION 9 — FINAL CTA

### Headline

You Already Have the Content. Now Build the Distribution Behind It.

**Subheadline:** Let's see what we can build around your existing content.

**CTA:** Book a Strategy Call

## 5. Design Direction

**Feel:** Premium + Modern + Tech-enabled + Aggressive + Results-focused

Use a dark / premium visual system, large typography, strong animations, social media content integrated into the design, real campaign screenshots, minimal paragraphs, lots of visual proof and clear CTAs throughout.

**Avoid:** Generic agency templates, corporate-looking layouts, stock photos, huge blocks of text, overexplaining the service, too many navigation options and generic headings like “About Us” and “Our Services”.

The visitor should be able to scan the entire page and understand the business without reading every paragraph.

## 6. Assets Needed From Us

- Final GetVeevz logo
- Brand colors/fonts
- Approved client logos
- Case studies
- Verified campaign results
- Analytics screenshots
- Short-form clip examples
- Testimonials
- Team/company photos if required

- Final CTA/contact details
- Pricing approach

### Needs confirmation

1. Which client logos can we publicly display?
2. What are our **3 strongest case studies**?
3. What verified results can we publicly claim?
4. What is the exact CTA — **Book a Call / Apply / Get Proposal**?
5. What is our current verified number of clippers/editors?
6. What is the typical campaign onboarding timeline?

## 7. One-Line Direction for the Team

Build GetVeevz as a premium content-distribution company, not a generic clipping/editing agency. The website should sell the outcome — turning existing content into large-scale short-form distribution — and use real campaign proof to make that promise believable.
